INTERNSHIP

MERN Stack developer May 2023 - Sep 2023

I worked as a MERN stack developer for 4 months in Edureka. Here I learnt both front-end and back-end web development technology and also did a projects like weather checking website, food ordering website.

SKILLS

Web Development (HTML, CSS, Java Script)

MERN Stack : MongoDB, Express.js, React.js, Node.js

C++

PROJECTS

Food ordering website

This website is similar to zomato. Technologies used for front-end are React.js and bootstrap. And for the back-end Node.js, Express is used to create server, Mongoddb used for database.

Weather checking website

This website is used as a weather checking website were technologies used for front-end is vanilla javascript. Open weather API is to get the weather data. Weather details of particular place can be accessed using this website.

E-Commerce website

In this project I worked in the front-end part of the website in enhancing the user experience. Front-end part of the website with vanilla java script and Node.js, Express in the backend, Firebase is used for database.

Portfolio website

This website is built for myself to showcase my works. This website is created using HTML, CSS and Java Script. And it is deployed in render.
